

**Profile Stool** by Matthew Hilton

## Profile Stool by Matthew Hilton

The Profile Stool is rich in design and functionality principles creating a modern seating option. The contemporary feel and minimal look of this stool does not compromise on comfort, ensuring long periods of sitting is extremely enjoyable. This distinct stool shows perfectly how design meets function making it a sensible choice for modern day living.

Solid strips of timber, laminated into a curve, gives the stool its feature of a recessed back which provides a very comfortable piece of furniture. Solid wood is used to construct this design which is complimented by an upholstered leather and foam seat pad, which gives the stool its light and simple aesthetic. Attention to detail is visible in the stainless steel foot rest recessed into the wood on the bottom of the stool. This extra feature provides protection against marking and scratching of the wood.

The Profile Stool is also available as a Profile Counter. They both come in two finishes; oak and walnut. The Oak finish includes brown leather upholstery and the walnut finish includes a black leather upholstery.
